

EAT WITH YOUR HANDS.

Just how big is a “serving”? Sometimes it’s easy to just **look at the label to find out** -- eleven chips might make a one-ounce serving, or a big candy bar might actually contain two or three servings. But other times, it’s harder to tell what makes a serving, especially when you’re eating at a restaurant or fast food

the big number

210

Today’s 5-6” bagel has 210 more calories than the 3-4” bagel that was the more typical size 25 years ago.

place. And that means **we sometimes eat WAY more than we think we do.** So

look at it this way: a cup is about **the size of a fist**, an ounce of cheese is **as big as a thumb**, a teaspoon of peanut butter or mayonnaise is a dollop about **the size of your thumbnail** (and three teaspoons make a tablespoon), and a 3 ounce serving of meat, fish, or chicken **fills up your palm.**

**EAT BETTER. PLAY HARDER.
LIVE HEALTHIER. LEARN EASIER.**

“EAT WITH YOUR HANDS”

EAT BETTER

Try lots of different fruits, veggies, and whole grains for a healthy diet. You're bound to find a few you really like!

CLEMENTINES

Clementines are small citrus fruits that are a winter favorite in the U.S. They're usually seedless and each juicy, easy-to-peel little orange contains 35 calories, a gram of fiber, and 60% of your daily vitamin C requirement.

LEARN EASIER

One way to keep from eating too much is to eat more! Eating a healthy snack between meals can actually help keep us from overeating at mealtime. And when kids have a little something to eat after school -- apple slices and peanut butter, anyone? -- they can bear down and concentrate on their homework instead of their stomachs!

PLAY HARDER

It's easy to find a chart on-line telling you how many calories you burn doing various activities. For example, running for an hour at a 6 mph pace burns about 500-900 calories, depending on your weight. The rest is math. Want to indulge in a big portion of a favorite food? Have at it! But then be sure to work it off.

LIVE HEALTHIER

Just because something is called a "value," a "combo," or a "deal" doesn't mean it's saving you money. Studies show that most folks actually spend more ordering a so-called "value meal" than they would ordering smaller sizes off the menu. And wolfing down those ever-growing portion sizes also cost us plenty in health-related costs over time. The largest size of fries might contain 3 times the calories and fat of the smallest size, and a super-sized fast food meal might contain 1500 calories or more -- that's two-thirds of a day's worth of calories for most people.

No break for Covid.

Guess what? The Pandemic doesn't know when we're celebrating holidays. Truth is, Covid *never* takes a day off. And that's even more true, unfortunately, over the Winter break when we're more likely to be interacting with family and other folks who might be from out of town or we might not see all the time. We urge our families not to let your guard down! Continue to be aware of high risk situations and be sensitive to those who may be most vulnerable. Wear a mask when you should and keep washing those hands!
